

# **Admission Checklist for Your Short-Term Rehabilitation Stay**

## √ Comfortable clothing for 7 days

- Due to IV's, weight gain is common after surgery
- You will need clothes you can freely move in for therapy sessions (we do not recommend jeans)

#### ✓ Athletic shoes

- The stability provided by good footwear is needed during therapy sessions
- Tie shoes are preferred to reduce risk of your foot sliding out of shoe

#### ✓ Robe

## ✓ Personal care items

\*Toothbrush, \*toothpaste, \*brush/comb, \*deodorant, make-up, shaving kit
 \*Items provided by facility, but residents can bring their own preferred products from home

# ✓ Glasses / contacts / hearing aids and storage cases / dentures cup or case

#### ✓ Medication list from home

We need to compare this list to the medication list provided by the hospital

## ✓ Insurance information/cash

- Your insurance information will be verified for proper coverage of your stay
- You might want cash for miscellaneous items (i.e. pop, haircut). A petty cash account is available in the business office. We recommend that you not keep cash or valuables in your room.
- ✓ Copy of healthcare directives (Power of Attorney for Healthcare / Finance)
